Meeting Announcement

2007 Spring Lecture Series

Tracking Thymocyte Migration in situ: Two-photon Microscopy and Advanced Computational Methods

Kevin Frischmann, Head of Technical Support, US and Canada, Bitplane Inc

Thursday, April 5th, 2007, 7:30 pm
American Museum of Natural History, Linder Theater, New York, NY

Much like confocal microscopy, two-photon imaging provides the capability to acquire three-dimensional (3D) fluorescence images which are entirely in sharp focus. Because the images are digitized in three dimensions during acquisition, they can be inspected and measured in software in three dimensions, providing great flexibility and improved accuracy for exploration and analysis. Where two-photon imaging goes beyond confocal microscopy is in the ability to reduce phototoxicity to live cells, and to image deep into the specimen, allowing for extended time-lapse imaging and intact tissue imaging. Because the natural environment of living cells is structured in three dimensional space, and can change over time, it is ideal to study them using imaging techniques that support four dimensions, and a life-sustaining environment. Such 3D time-lapse, or “4D” images generate huge amounts of data, which require advanced software to visualize, and to extract the information of interest. This presentation will focus on how software is used to solve such challenges, highlighting an application where analysis of the migration patterns of thymocytes within an intact thymic lobe revealed behavior that was previously unknown.

Kevin Frischmann is the Head of Technical Support for Bitplane Inc., a provider of software for multidimensional microscopy. He earned his B.S. in Biology from Montclair State University, and is currently based in NJ.

NYMS Members and their guests are welcome to join the speaker for dinner ($25.00 all inclusive) at 5:45 p.m. at Rain Restaurant (http://rainrestaurant.com/), 100 West 82nd St. at Columbus Ave. Please reserve your place(s) with Angela Klaus by noon on April 3rd. Angela can be contacted by email (avklaus2@yahoo.com) or by phone (201-988-6251).

Have You Sent in Your Dues for 2006-2007?
N.Y.M.S. BOARD OF MANAGERS

President
Peter Diazcuk
John Jay College
445 W 59th Street
New York, NY 10019
Department of Sciences
212-237-8896
pdiaczuk@jjay.cuny.edu

Vice President
Angela V. Klaus, Ph.D.
Department of Biology
Seton Hall University
400 South Orange Ave
South Orange, NJ 07079
klausang@shu.edu

Treasurer
Mel Pollinger
18-04 Hillery Street
Fair Lawn, NJ 07410-5207
(201) 791-9826, pollingmel@verizon.net

Secretary
Pauline Leary
Smiths Detection
21 Commerce Drive
Danbury, CT 06810
(203) 207-9754
Pauline.Leary@smithsdetection.com

Past Vice President
John A. Reffner, Ph.D.
Smiths Detection
97 Ocean Drive East
Stamford, CT 06902
(203) 348-8098, jareffner@cs.com

Curator & Education Chair
Don O’Leary
10 Sampson Street, Unit 113
Saddle Brook, NJ 07663
(201) 368-8849
dkoleary@verizon.net

Assistant Curator
Joseph Orosz
29 Kings Road
Rockaway, NJ 07866
(973) 625 5988
j1orosz@aol.com

Membership Chair
Mary McCann
McCann Imaging
161 Claflin Street
Belmont MA. 02478
(617) 484-7865 Fax (617) 484-2490

Webmaster
Roland Scal, Ph.D.
Dept. Biological Sciences & Geology, M-213
Queensborough Community College
222-05 56th Avenue
Bayside, NY 11364-1497
Tel 718-631-6071
Fax 718-631-6678
rscal@qcc.cuny.edu

Board Member
Gary Mayer
40 North Bridge Street
Somerville, NJ 08876
mayer@co.somerset.nj.us

Board member
Seymour Perlowitz
Midwood Station, Box 300060
Brooklyn, NY 11230-0060
(718)338-6695
perlowitz@hotmail.com

The Mission of the New York Microscopical Society is the promotion of theoretical and applied microscopy and the promotion of education and interest in all phases of microscopy.

Dues and Addresses

Please remember to mail in your Dues to Mary McCann, Membership Chair (see this page for address).

Annual $30
Supporting $60
Life $300 (payable within the year)
Corporate $175 (includes one advertisement in NYMS News)

To avoid missing notices:
Notify Mary if you have changed your address, phone or email.

Alternate Meeting Notifications
Please note that due to time constraints in publishing, some meeting notices may be available by calling Mel Pollinger at 201-791-9826, or by visiting the NYMS website.

Buy and Read a Good Book on Microscopy.
Professor Watt W. Webb's undergraduate studies at Cornell University, Ithaca, NY

**SCIENCE COUNCIL OF NEW YORK CITY - SCONYC**

For 30 years, the Science Council of New York City has been in the forefront of offering quality professional development for the science educator. No Child Left Behind legislation still dominates teacher certification and professional development. Annual Yearly Progress will kick in with a third assessment, which in NYS might include science. These assessments are now found at all levels, elementary (ELS), intermediate (ILS) and commencement (Regents) necessitating that all science educators learn new and/or different techniques to teach science content, inquiry and pedagogical skills. Using Watt W. Webb is this year’s (2007) Awardee. The Award presentation will be on November 15 at the EAS meeting.

Watt W. Webb
Professor of Applied Physics
S.B. Eckert Professor in Engineering
Cornell University, Ithaca, NY

Professor Watt W. Webb’s undergraduate studies at MIT in Business and Engineering Administration for his SB degree in 1947 led him to engineering research and development at Union Carbide Corporation Research Laboratories until 1952, then back to MIT for his ScD in Metallurgy awarded in 1955, then returning to Union Carbide for solid-state and chemical physics and as coordinator of fundamental research and then assistant director of research until he joined the Cornell University faculty of Engineering Physics in 1961, introducing experimental research in superconductivity and in continuous phase transitions. He served as director of the School of Applied and Engineering Physics from 1983 to 1989 and is presently a member of the graduate faculties of eight fields, which indicates his interdisciplinary research focus. He has directed the NIH Developmental Resource for Biophysical Imaging Opto-Electronics for the last 20 years. He is on the board of directors and executive committee of the Cornell situ measurements of the dynamics of fluorescence flicker by FCS, photobleaching, phototoxicity, and induced fluorescence are being used to discern dynamics of biological processes and molecular mechanisms of disease. Multiphoton excitation in laser scanning fluorescence microscopy provides for high resolution, high signal-to-noise imaging in living cells and deep in turbid tissues in vivo and significantly reduces photodamage and minimizes image degradation due to scattering and autofluorescence. His laboratory at Cornell University continues to extend the frontiers of these technologies, now for example extending MPM and FCS to imaging molecular processes within the cellular nucleus for gene expression in vivo. Recently initiated is the development of technology for introduction of MPM into Medical Endoscopy for in vivo, in situ real time diagnostics.

Variable Focus Digital Image Stacking

Images 1 (single image) and 2 (stack of 7 images) are of a radiolarian at 200x, taken with an Olympus BHT microscope fitted with an Olympus C-5060W digital camera. The 7 original images were stacked using CombineZM. By Mel Pollinger

February 2007 Mystery photo

Congratulations to Wiebke Hinsch for the correct answer: Substage mirror (on old circa 1950 child’s microscope).

Interested in Micro-Minerals/Fossils?
We hope you visited the Clifton Mineral Show, March 10-11, at the Pope John Paul II Elementary School at 775 Valley Road (North of rt 3 at Rt 46), Clifton, NJ. Sat & Sun 10-5.

Got something you want published in the Newsletter?
- Technical article
- Images
- For sale
- Wanted to buy
- Any microscopy-related item

Write, call or send an email message to:
201-791-9826 or pollingmel@verizon.net
or
Mel Pollinger
18-04 Hillery Street
Fair Lawn, NJ 07410

Regarding how you can receive future newsletters, you may choose one of the following methods:
1. Regular mail, gray scale images: Do nothing. Color may continue.
2. Email with full color images, pdf file: Needs your active email address.

Our thanks to Ron Smeltzer for the dues reminder.
